Twice as easy through thick and thin STABILO Trio 2 in 1

Pencil case overflowing, caps rolling all over the table, cap off, cap on, wrong colour, wrong thickness – and the picture's nowhere near finished?! If anyone knows how stressful drawing at school can be, it's younger kids. What they really need is less stress and more creativity. A new product from STABILO is coming to the rescue: the STABILO Trio 2 in 1 double-tipped fibre pen. It quite literally helps school kids through thick and thin. How? Because this first-ever double-ender from STABILO features a fine tip for writing and drawing and a broad tip for colouring in large areas.

Of course, the pen also has an ergonomic triangular grip zone and a sturdy tip at each end as well as caps that can be stacked on top of each other and washable ink. Available in a set of 10.

In a word: This felt-tip pen makes everything clear, leaves plenty of time for drawing and saves space in the pencil case.
