

## PRESS RELEASE

### **The trick with the click – the awards go to the STABILO swing click**

**As the latest addition to the large STABILO highlighter family, the swing click will soon have its own fans. Just like a ballpoint pen, all it takes is a click – meaning there's no cap to keep an eye on. Guaranteed not to leak and featuring a pocket clip, it's handy for people on the go, too. Thanks to its winning combination of functionality, design and creativity it has won two renowned prizes straightaway: "Product of the Year 2007" and "iF product design award 2007".**

As the only highlighter with a flat design, practical clip and retractable tip, the STABILO swing click is just the thing if you're looking for a more convenient way of highlighting. As well as the practical pushbutton mechanism, the matt-surface, non-slip grip-zone and slim shaft make it comfortable to hold. It highlights what's important in four fluorescent colours and two line widths with water-based ink for use on paper, copy or fax.

**In a word: click meets clip – it doesn't get more practical than that!**
