Making life difficult for counterfeiters – the STABILO 'CULTdocusafe Retractable Ballpoint Pen with Document Safe Ink + Refill

STABILO, a trendsetter when it comes to innovation, is now extending its professional office culture range to three products to cover the most varied of requirements.

The STABILO 'CULTdocusafe provides the market with a ballpoint pen with document safe ink (in compliance with ISO-12757-2 DOC), which is definitely the pen of choice when it comes to completing official documents. Available in four colors, the retractable, refillable pen fits in perfectly with the stylish image of the STABILO family. The trendy white translucent look and strong contrasting shaft color show just how modern and fresh the office world can look. Beyond its appearance, even critical professionals love the product features. After all, an ISO standard regulates the test criteria for document safe writing instruments down to the very last detail - and the STABILO 'CULTdocusafe fulfils every last requirement.

A pen you can depend on

To be certified as "document safe", the ink used in the pen has to meet numerous durability standards as stipulated by the ISO standard 12757-2 DOC. It has to pass complex criteria that test whether it is fade-resistant, waterproof, solvent-resistant, chemical-proof, wipe-resistant und non-erasable. No problem for the STABILO 'CULTdocusafe, it even meets all these standards in every color: forgery-resistant writing for all official papers!

That's tomorrow's writing, today

In contrast to these tough ISO conditions, the rest of the features of this new pen are all about great comfort. A technologically advanced "low viscosity" ballpoint paste guarantees a smooth writing performance. A triangular, non-slip grip zone ensures perfect grip and relaxed writing. It is also perfect for writing quickly and efficiently, (with a line width M of 0.4 mm) as is often necessary for signatures or filling out forms. Refills are available in blue and black.

The result:

The new STABILO 'CULTdocusafe combines design, performance and security.
